To Whom It May Concern:

I understand that Don Jefferies has applied for a position in your school district. Let me take this opportunity to whole-heartedly recommend him for the job.

Not only have I known him personally for many years, since our own high school days, but my three children were in high school while he still served here as principal. During this time I found Don to be an enthusiastic advocate for his students, while maintaining a strict policy on discipline problems. He implemented many programs designed to get kids involved in school, to give them a greater sense of self-worth, and to provide the means for students to give, and equally important, to receive from their school.

In every position Don has served in, he has been conscientious, hard-working, and very dependable. He has always looked for ways to make things better. Because these are qualities that are crucial for any leadership position, I feel he would serve the school district and the whole community well.

Yours truly,

  
Nolan Ryan
